Data Aggregation and Analysis

1.1 Task Overview

What you'll learn

- Understand the importance of data engineering and analysis in a long-term data-focused vision.
- Gain experience in using real-world transactional data for analysis.
- Learn to perform data analysis and answer specific questions based on the dataset provided.

What you'll do

- Analyze the "CSV Data Set" of supermarket transactions to address key questions.
- Document the analysis process, including formulas used, using spreadsheet software.
- Submit the analyzed file for review.
